

NOTICE AS OF JULY 1, 2014

All commercial and residential construction that is heated or cooled is required to comply with the 2012 International Energy Conservation Code.

In this code are mandatory requirements including third party insulation inspections, blower door testing, duct testing, thermal envelope sealing, high efficiency lighting, among others.

All testing and third party required inspections are to be performed by an approved agency. **Compliance is the responsibility of the design professional and/or the party in charge of the project.**

To view the 2012 I.E.C.C. you may go to MA. Dept. of Public Safety-B.B.R.S. and view I.C.C. codes.
